WHAT IT MEANS TO YOU:

- WillScot is not obligated to pay you during a strike
- The union may offer "strike pay," which is usually not as much as what employees typically make, especially if you regularly work overtime
- During a strike, employees might have to cover the full cost of health insurance
- WillScot can hire workers to do your job while you are on strike AND if the strike is over economics, a replacement worker could get to keep your job permanently when the strike is over
- If a strike happens, all employees in the bargaining unit could be pressured to walk out and walk a picket line.
